Daily rate £640 plus VAT

Terms

All crew and artists are provided at cost to client.

A production fee is then charged, based on the industry standard rate of 30% of the production costs to cover preproduction planning, recce and resourcing, location insurances and ledger costs.

VAT is added at the prevailing rate.

50% of the budget is payable prior to the shoot.

The balance in due 30 days from completion.

Long Term Projects

Where a client requires regular video project based on an archive of previously shot footage, it is cost effective to keep the archive “on line” in the edit suite. This saves time re-importing footage back into the system for each new project. This saves both time and money. We would allocate storage space on our media servers which is charged on the basis £5 of each gigabyte of space held per month.
